

Subject Index	Page
Differential Cross-Sections and Critical Points For Elastic Scattering of Electrons by Krypton Atoms in the range (2-110) eV by using an Optical Potential Model . A.H.Hussain and F.A.Ali	1-16
Unconditionally Stable Fourth Order compact Finite Difference Scheme for 3D Microscale Heat Equation. A.J. Harfash	17-32
Some Factors Affecting the Natural Frequency of a Bubble Oscillating in liquids A.Z. AL-Asady	33-46
Nuclear structure of $^{74,76}\text{Ge}$ isotopes which have gamma unstable O(6) dynamical symmetry using interacting boson model A.A.W. Redah	47-59
Critical Points of Scattering Positrons from Neon, Krypton and Xenon atoms at low energy regions by using dipole polarization potential A. A. Khalaf and F. A. Ali	60-72
The Effect of Dependent Data on type Error Rats formultiple Comparison Procedures for 3- WAY Crossed Balanced Model Z.A. AL- KAABAWI	73-85
The Effect of the feeds (SBFA and LBFA) on Parameters of Parabolic Reflector antenna A.S. Tahir	86-100
Bayesian Estimation of the Logormal Distribution Mean Using Ranked SET Sampling R. A. Ahmed	101-112
Optical Damage Resistance in a Pure Congruent Lithium Tantalate Crystal H. L. Saadon	113-121
Bilinearization for Sine-Gordon-Type Equations I.A.Malloki and W.F.Al Rikabi	122-132
Study of the scattering and Annihilation of low energy positron with noble atom . M. M. Abdullah , A. A. Khalf	133-158
The Internal Pressure Dependent Behaviour of a Cavitation Bubble in Refrigerants A.Z. AL-Asady	159-174
